Profile

Creative Software & Android Developer with experience building native mobile applications and integrating complex backend services. Tested apps extensively and resolved identified bugs and errors to improve application stability. Bright critical thinker with adaptability and accuracy strengths.

Skills

Programming

Kotlin, Java, Python, C++, C, SQL, HTML, CSS

Android Native

Jetpack Media3, ExoPlayer, Android Studio, Material Design 3

Tools & Cloud

Firebase, RESTful APIs, Git/GitHub, Security Best Practices

AI & Machine Learning

TensorFlow, OpenCV, CNNs, Scikit-learn

Projects

Student Room Sharing App

- **Tech Stack:** Java, Firebase Authentication, Firebase Realtime Database, Firebase Storage, Android Studio.
- Developed a role-based Android application for finding student accommodations, integrating Firebase for secure user management, real-time search, and image uploads.

AudioPlayer – Modern Android Music Player

- **Tech Stack:** Kotlin, Jetpack Media3, ExoPlayer, Material Design
- Built a high-performance Android music player featuring seamless background audio playback and dynamic notification controls using Kotlin and Media3 architecture.

NutriVision – AI Nutritional Insight Analyzer

- **Tech Stack:** Python, TensorFlow, EfficientNet, OpenCV, FastAPI
- Built an AI-powered food recognition system that identifies items from images and delivers nutritional insights via integrated backend APIs and deep learning.

Log Analysis & Intrusion Detection System

- **Tech Stack:** Python, Flask, Machine Learning, HTML/CSS
- Developed a web-based cybersecurity application to automate log processing, identifying suspicious activities and potential security threats.

Education

B.Tech in Computer Engineering, SJCEM

Aug 2024 – Present | Palghar, India

CGPA: 8.56

Diploma in Computer Engineering,

SJCEM, Polytechnic

2021 – Jun 2024 | Palghar, India

Percentage: ~83.14% (Final Year)

Experience

Android App Development Intern,

Enjay IT Solutions Ltd

May 2026 – Current | Vapi, India

- Developed user-friendly interfaces using Android Studio and Java, Kotlin to enhance mobile application functionality.
- Engaged in learning new technologies and tools, contributing to personal development and team knowledge base expansion.
- Developed software solutions using Kotlin and Firebase to enhance operational efficiency.

Cybersecurity Intern, ALPHA INNOVATION

May 2026 – Jul 2026 | Remote

- Monitored network security alerts and incidents to identify and flag potential threats.
- Evaluated new cybersecurity tools and technologies, ensuring that the organization remained up-to-date on industry best practices.

Certifications

CRM Admin Studio: Essentials,

Enjay IT Solutions Ltd.

Applied Git Proficiency Certificate,

KraftPixel

Kantascrypt Angular API Development,

Kantascrypt
